

**Operating Instructions:**

1. To open Energizer depress sides of lower case and gently pull apart.
2. Insert 6 "D" cell batteries into cavity taking care to follow polarity guide.
3. Connect earth lead to earth terminal on Energizer. Earth lead is stored in battery cavity.
4. Connect earth wire to a suitable earth stake. Attach to fence between 2 Gallagher Treadin posts – press orange clip downwards and slide onto wire/tape.
5. Remove batteries when storing Energizer.
