

Quick Connection Guide Gallagher B10 battery Energizer

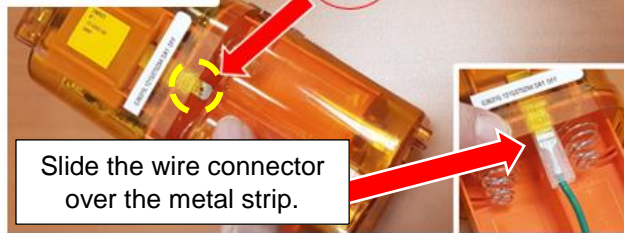

1. Placing the batteries

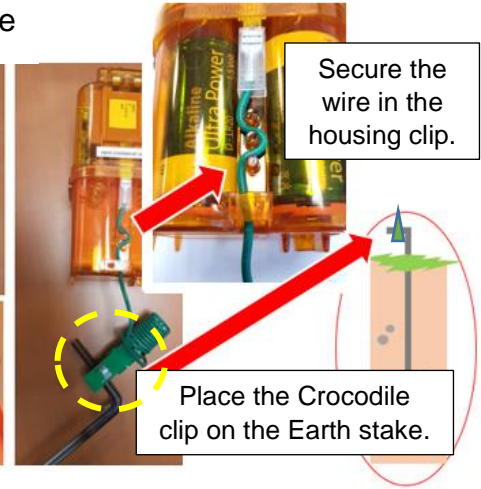

Install 6 D/LR-size 1,5V Alkaline batteries in the required position (see printing housing), close the battery housing.

2. Connecting the Earth Wire

Slide the wire connector over the metal strip.

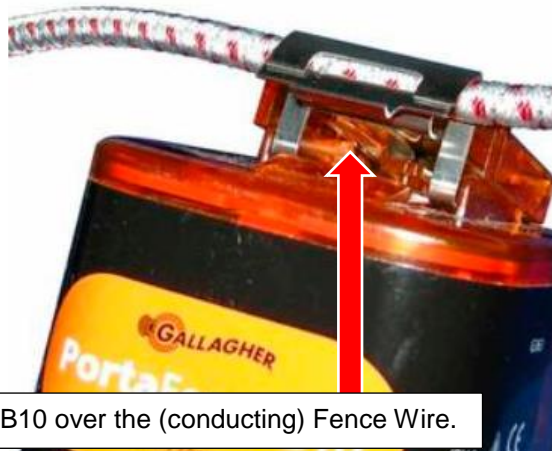

Secure the wire in the housing clip.

Place the Crocodile clip on the Earth stake.

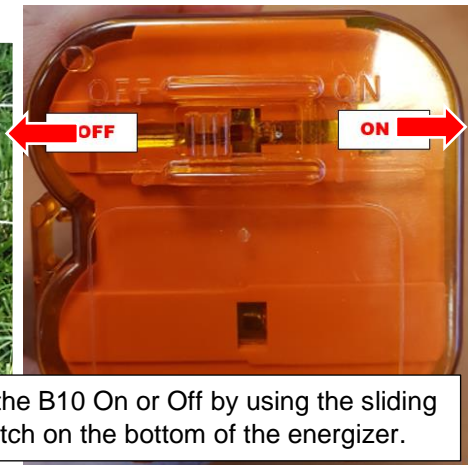

3. Connecting the Fence Wire

Place the metal part on top of the B10 over the (conducting) Fence Wire.

4. Switching the B10 On/Off

Turn the B10 On or Off by using the sliding switch on the bottom of the energizer.
