

PROTECT YOUR PET AND YOUR GARDEN WITH THE GALLAGHER PROTECTION KITS

Also suitable for keeping out pets and other animals

Our Protection Kits have been developed for private users who are looking for a solution to a growing need. The fencing keeps your own pets in the garden and the neighbours' cats

out. The kits are also suitable for keeping out herons, stone marten or slugs and snails. We provide a solution for every problem.

ELECTRIC FENCING AROUND THE HOUSE

Are you looking for a way to protect your pets or your garden? Coffee grains and lemon peel did not have the required effect of chasing the cats from your garden? Gallagher has a solution that does work: electric fencing

ELECTRIC FENCE KITS

- ✓ Easy to install yourself
- ✓ 100% safe for humans and animals
- ✓ Unobtrusive and maintenance-free
- ✓ Power outlet not required
- ✓ Highest quality and longevity

KEEP UNWANTED CATS OUT OF YOUR GARDEN

Nice the neighbour's cat, but why does it always choose your garden furniture as a place to relax, or the kids' sandbox as a litter box? Also ideal to keep your own cat inside your garden.

See page 4

GIVE YOUR DOG, CAT OR RABBIT SAFE FREEDOM

What could be better than letting them have their own way in your garden, without you having to worry about them escaping or turning your beautiful flower beds upside down?

See page 5

PROVIDE SAFETY FOR YOUR FISH

Prevent them from falling prey to wandering herons or cats.

See page 5

PREVENT DAMAGE BY MARTENS

Prevent damage to your home with this proven solution

See page 9

PROVIDE SAFETY FOR YOUR CHICKENS

Prevent them from being caught by cats or foxes.

See page 6

ELECTRIC FENCE KEEPS CATS INSIDE OR OUTSIDE YOUR GARDEN

The cat fence set is designed to be placed on an existing wooden fence. It is the ideal fence set, which is 100% safe for humans and animals. You do not have to worry that the kit will be very visible, as the fence set is specially designed not to stand out. With the fence set, you can create a fence up to 50 metres.

The complete cat fence set is a very economical total solution. It is also very quick and easy to install. The cat fence kit comes with a compact mains or solar powered fence energizer, which will ensure that everything you hold dear stays safely in the garden and other animals will not enter your garden.

- ⦿ Easy to install on any type of fence
- ⦿ 100% safe for humans and animals
- ⦿ Suitable for 50 m of fencing
- ⦿ Easy to expand

ELECTRIC FENCE

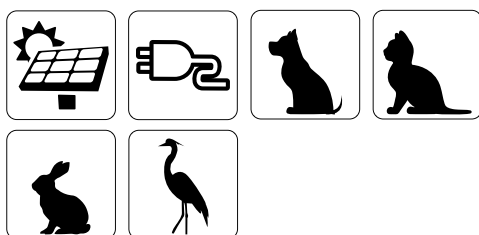

AROUND YOUR GARDEN OR POND

Gallagher's garden and pond kit is the ideal solution for keeping unwanted animals out or keeping your own pets inside. This fence works with posts that can be placed every 4 metres. Each kit includes 100 metres of wire. So if you want to install a fence with three lines, it can be up to 33 metres long in total. Need more length? No problem. You simply buy extra wire or posts to extend the set.

Depending on your situation, different kits are available. For small dogs, cats, rabbits and herons, Gallagher recommends a 50 cm high fence. Do you have a large dog? Then go for an 80 cm fence. If you have access to a 230V connection, it is best to go for the kit with the M35 energizer. Don't have a 230V connection nearby, or just want to go for the solution that is easiest to install or move? Then go for a kit with the solar-powered S6 energizer.

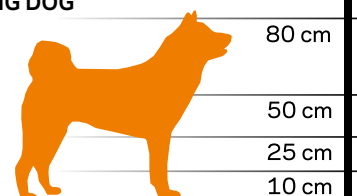

SMALL DOG/CAT

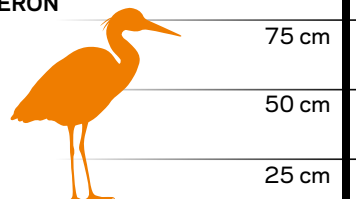

Afstand tussen de palen: maximaal 4 meter.

BIG DOG

Afstand tussen de palen: maximaal 4 meter.

HERON

Afstand tussen de palen: maximaal 4 meter.

RABBIT

Afstand tussen de palen: maximaal 4 meter.

PUTTING UP ELECTRIC FENCING

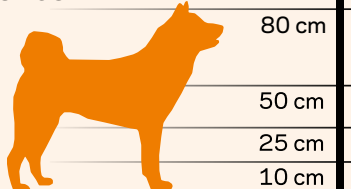

Putting up electric fencing is relatively simple. With the Gallagher instruction videos, it really is a piece of cake. However, it is extremely important that you take account of the type of animals the fence is for. Take account of the height of the post, the distance between the posts and the height of the wires. Below we have the most common situations. If you would like more information, please contact us. We're happy to help!

SMALL DOG/CAT

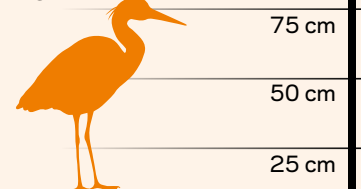

Distance between the posts: maximum 4 metres.

BIG DOG

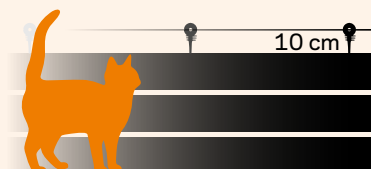

Distance between the posts: maximum 4 metres.

HERON

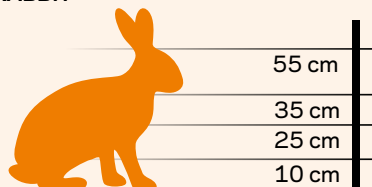

Distance between the posts: maximum 4 metres.

CAT FENCING

Distance between the insulators: maximum 1 metre.

RABBIT

Distance between the posts: maximum 4 metres.

TESTIMONIAL

- Annet van Dijk-

*“Now we
can make the
most of our
beautiful garden”*

“Recently, we had our garden landscaped.

It was a dream come true! Our garden was ready within a few weeks for us to enjoy. Unfortunately, the dream was short lived. We thought our garden was beautiful, but our neighbours' cat was equally enamoured by our beautiful borders.

We tried various solutions to keep the cat out of our garden: everything from coffee grains to lemon peel, but nothing had a lasting effect. Until I ended up in a professional shop in our village and started talking to the owner about our 'cat problem'. He recommended I put up electric fencing if I wanted to be done with the nuisance once and for all.

At first this solution seemed far too complicated and I doubted whether I would be able to put it up. Fortunately, I took up the advice and our garden is now fenced with a Gallagher electric fencing set. A super solution! And I haven't seen another cat since I put it up. We can make the most again of our beautiful garden.”

OUR PROTECTION KITS AT A GLANCE

- Bianca de Haan,
European marketing manager -

"We know that using electric fencing in the garden is not the most familiar and perhaps even the least favourite option for private users. Surely that's for farmers who want to keep their cows in the field? And isn't it bad for the animals or even dangerous for my children who play in the garden? We answer both questions with a resounding 'no'. With all the knowledge of electric fencing we have gathered since 1938, we are confident that electric fencing is actually the solution for problems around the house or the garden. I know from experience that my daughter can play in her sandpit, without coming across unpleasant presents from the neighbourhood cat."
